**NATIONAL
PARTITIONS**
BUILD FOR CHANGE

INTRODUCTION

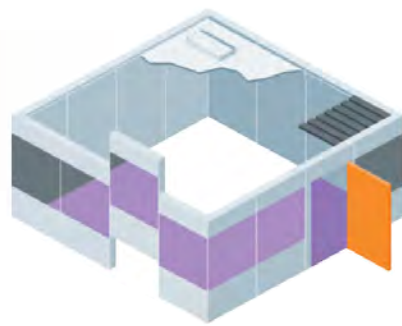

Since 1967, National Partitions has been the **Industry Leader** in prefabricated modular construction. As Pioneers of manufacturing pre-engineered modular systems, we take pride in our commitment to designing and building structures that can adapt to the evolving needs of our clients for decades of heavy use. Our excellent track record of constructing modular buildings, mezzanines, enclosures, and of course partitions, surpasses all other companies in the nation. We've produced upwards of 200 million square feet of modular products, making National the most preferred manufacturer in the industry. Our products are used by over 90% of the Fortune 1000 companies, in every U.S. Military Base, alongside the Space-shuttle as it is transported to the launch pad, used to make the world's largest interior prefabricated modular cleanroom, found miles underground in the world's largest underground business complex, SubTropolis, and can even be found at the White House. Our products are literally everywhere!

We offer various panelized systems to provide customers with high quality, efficient, and cost-effective building solutions. Our products support a vast variety of Industries, including manufacturing plants, grow and extraction facilities, warehouses, distribution centers, military bases, and educational institutions. Turn your empty space into revenue generating or saving production and personnel areas that also allow for an accelerated return on your building investment! Our dedication to innovation, adaptability, and customer satisfaction has made us a trusted partner for businesses of all sizes and industries!

NATIONAL PARTITIONS MISSION

BUILD FOR CHANGE!

Our philosophy, “Build for Change”, reflects our commitment to creating modular building systems that are flexible, reusable, adaptable and durable for decades of use, ensuring that they can easily evolve to any current or future construction need. With over 55 years of manufacturing experience, we take pride in our attention to detail to ensure that our products meet or exceed building codes and industry standards. National Partitions stands by the quality of our materials and manufacturing, with an industry leading 10-year warranty. No other manufacturer comes close to this level of quality and care. This is what distinguishes us from our competitors and has established National Partitions as the most trusted partner for modular construction expansion and separation projects since 1967.

OUR SYSTEM

FLEXIBLE, FUNCTIONAL, FOR DECADES

National Partitions stands out from other manufacturers with our unique patented connection systems, featuring two non-progressive innovative solutions available in both Steel or Aluminum. These systems surpass similar systems in every aspect. Modular components that allow for easy customization, reconfiguration, and expansion. Suitable for a wide range of applications from ISO 4 to GMP Rooms. Both systems utilize bolted, non-progressive connections that enable the concealment of electrical and structural steel within the wall system, freeing up the space from cumbersome columns and supports. These systems are full-height single piece construction, making them not only stronger, but also with a far smoother surfaces than our industry rivals. Seamless connections resulting in a cleaner and more sterile environment no matter the work place. National Partitions modular systems are easy to switch, swap, move or replace within minutes. National Partitions Environmental Rooms, the most adaptable and feature rich construction solution out there!

Modular - A design or construction approach that involves assembling prefabricated components (panels) into a larger, complete structure.

Non-Progressive - Any panel can be swapped/ replaced without causing disruptions to the surrounding structure or work productivity

NATIONAL'S ADVANTAGES

BUILT TO BENEFIT YOU

Cost Effective

Costing nearly one-third less than conventional building systems, the reconfigurable/relocatable nature of our wall systems ensures that your investment remains secure even as your needs change over time. Never lose your investment, even if you move! Moreover, our product qualifies for accelerated depreciation compared to stick-built walls (7 vs. 39 years), offering potentially huge tax savings.

Site Survey Service

One of the most valuable services that we offer. Why? Three words... Full Material Responsibility. We'll come to you and conduct a thorough site survey including full measurements for your project. We'll perform the walk-through and mark-up the approval drawings with you. Let us take the worry and guesswork out of the equation. We guarantee it all!

Installs 75% Faster

Modular construction is built for speed! In the time that most building departments take to schedule an initial review, National is delivering your building to you.

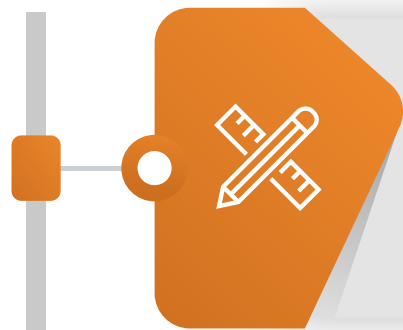

Complete and Complimentary Design Services

It's amazing what we can do with even a hand drawn sketch and a few dimensions. Our expert in-house design team provides, quick, accurate, architectural grade drawings for your building that is configured to your exact specifications. Plan views, elevations, layouts, steel details, reflective ceiling plans and more. We do it all for you.

OUR QUALITY SERVICES

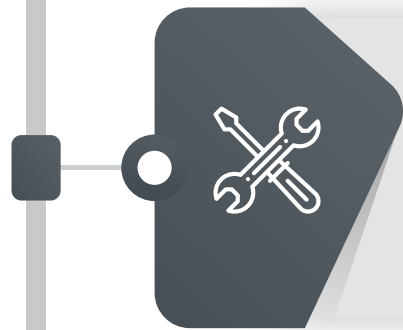

BEYOND EXPECTATIONS

You can depend on National Partitions to deliver amazing solutions with impeccable customer service, because our team of professionals guarantee each project is a complete success. We don't cut corners like others might. We're proud of our product spec for spec. But what makes National Partitions truly stand out is our people and services we offer.

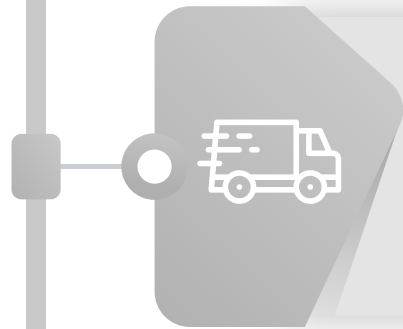

Professional Engineering Services

Our team of expert drafters and engineers specialize in modular construction, ensuring that your investment is designed exactly as you want it while maintaining full modularity, allowing it to adapt to your changing needs, and always code compliant. Permitting packages and P.E. stamps and calculations always available upon request.

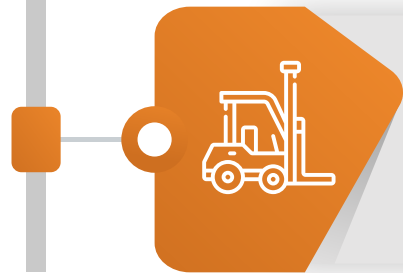

Installation

Our Professional Installers are fast, factory-trained, OSHA certified and we back our service with a 100% satisfaction guarantee. For those who prefer to erect themselves, we offer comprehensive training and supervision for your team, guiding them through the entire process. Ensuring every installation is done correctly, no matter who installs.

Delivery Directly to You

National Partitions provides local, nationwide, and international shipping services. We will get it there on time and complete. We take the extra-steps to ensure your materials arrive on site undamaged, as the only manufacturer in the industry that crates nearly every pallet. Taking the task of ensuring your order is delivered in perfect condition very seriously, whether it's by utilizing our own fleet or serving as our own broker.

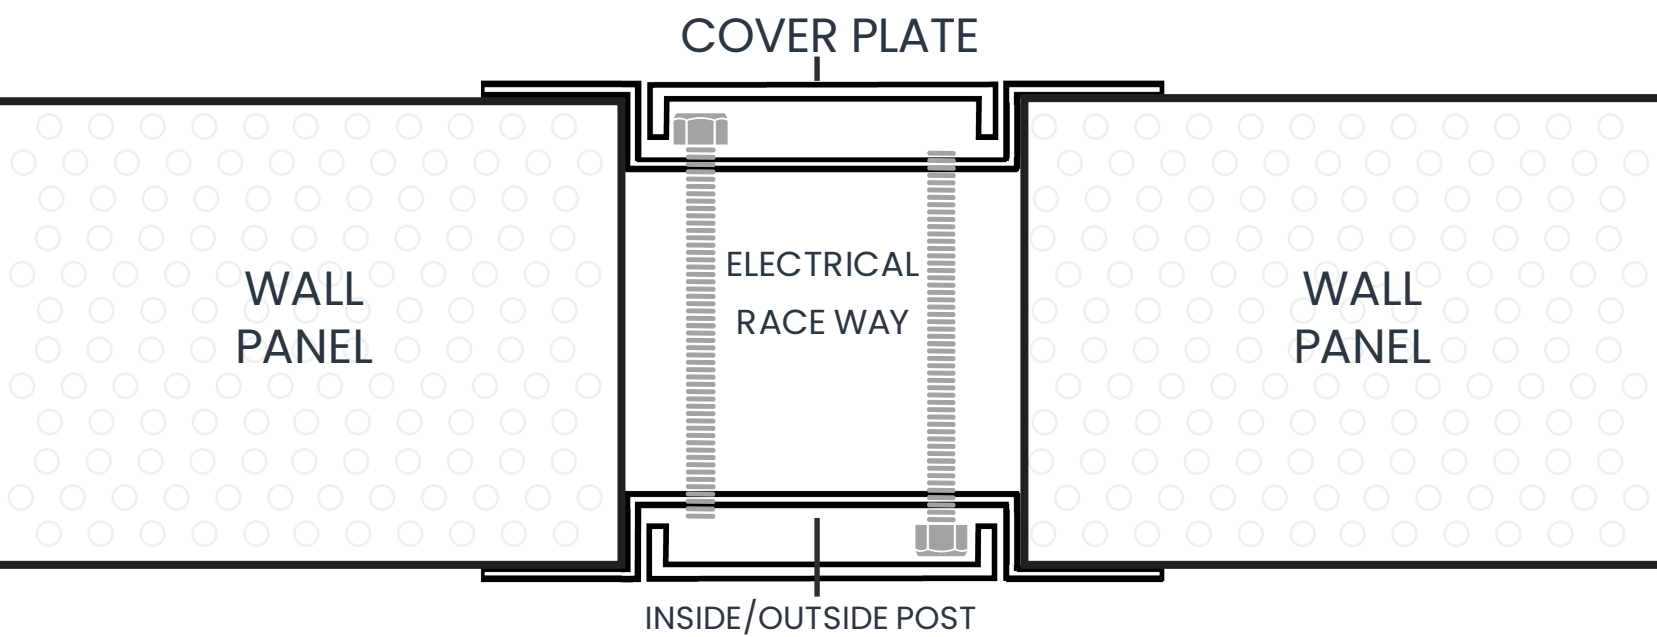

Relocation/ Move

Do you need to relocate your modular system to a new facility or reconfigure your existing layout? National Partitions can provide an install crew and transportation services to complete the entire task. We'll get you back up and running with little to no disruption and in record time.

STEEL CONNECTION SYSTEM

National Partitions Patented Steel System is known for its diverse functionality and structural integrity, while maintaining the benefits of quick and easy assembly. The Steel Post System pairs universal components with non-progressive design features that allow independent wall panel and electrical access without disrupting adjacent panels. It meets code compliance for lateral loading of panel systems and allows for load bearing designs up to 150 PSF to meet any project's needs. From sound deadening panels, to Class A or 1-hour fire rated panels, our steel post system integrates flawlessly with any and all of our panel types.

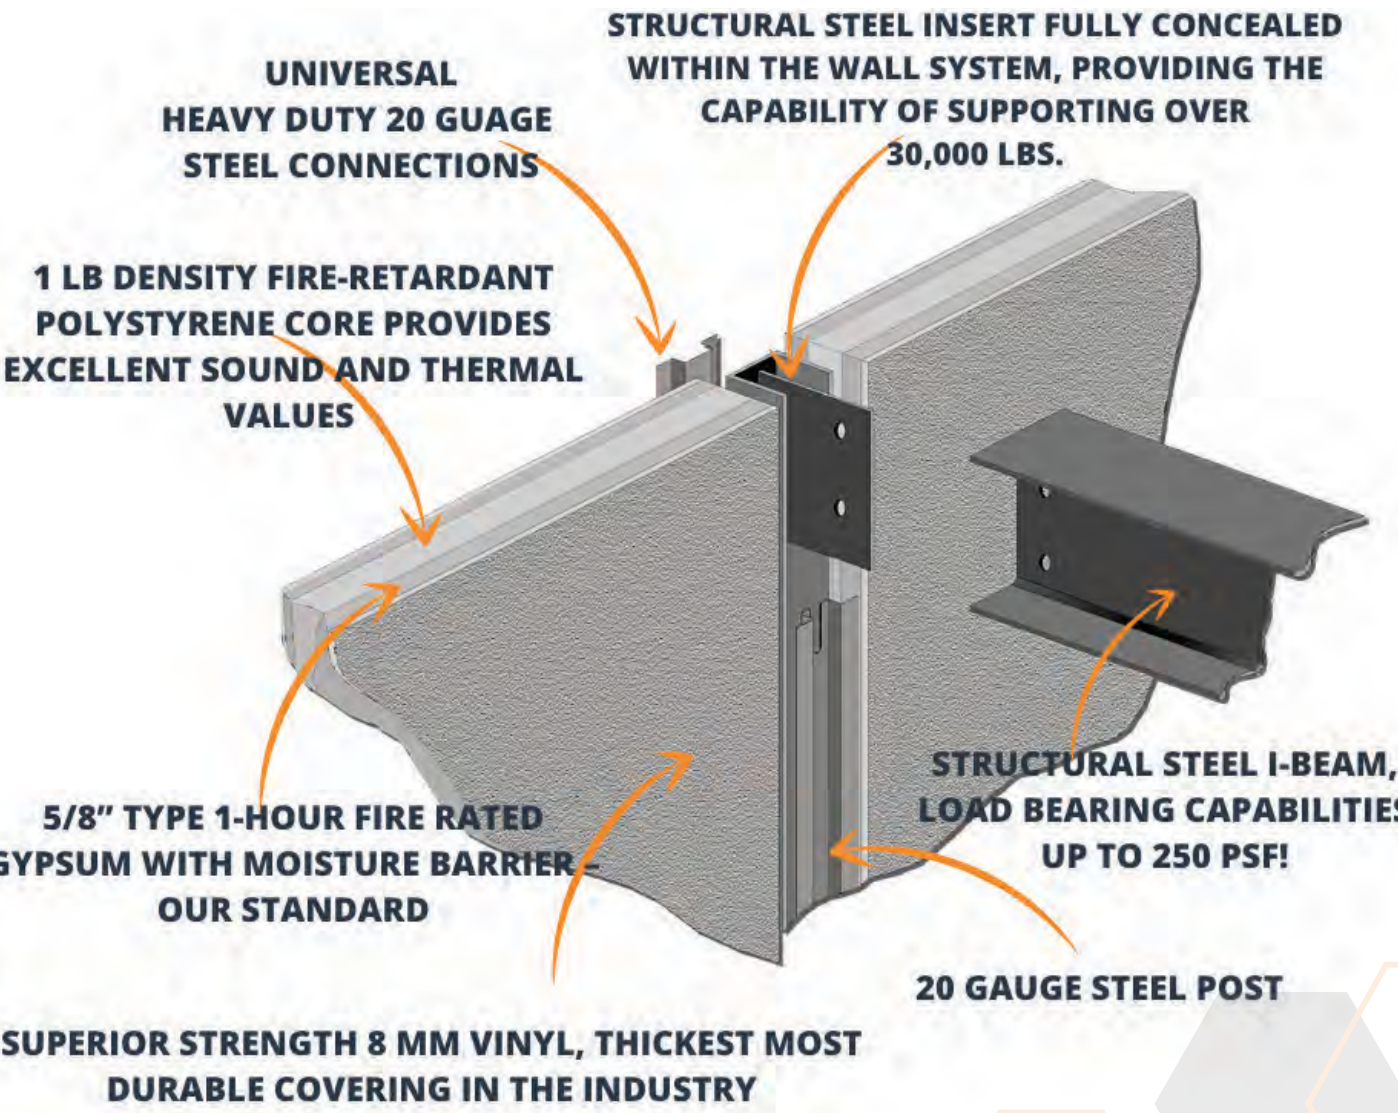

BENEFITS

- All vertical structural steel is concealed within our wall panel system.
- Vertical panel height capabilities up to 40' tall full-height. (No Stacked Panels)
- All components color matched across all of our finishes and surfaces
- Quick on-site custom sizing to adapt to any existing or future condition with standard power tools.
- Pre-punched Posts for easy electrical Installation and reconfiguration.
- IBC(Intl Building Code), Seismic Zones 1 - 4, Florida and California compliant
- 1-hour and 2-hour certified fire ratings.
- Suitable for all ISO6 - 9 Clean rooms

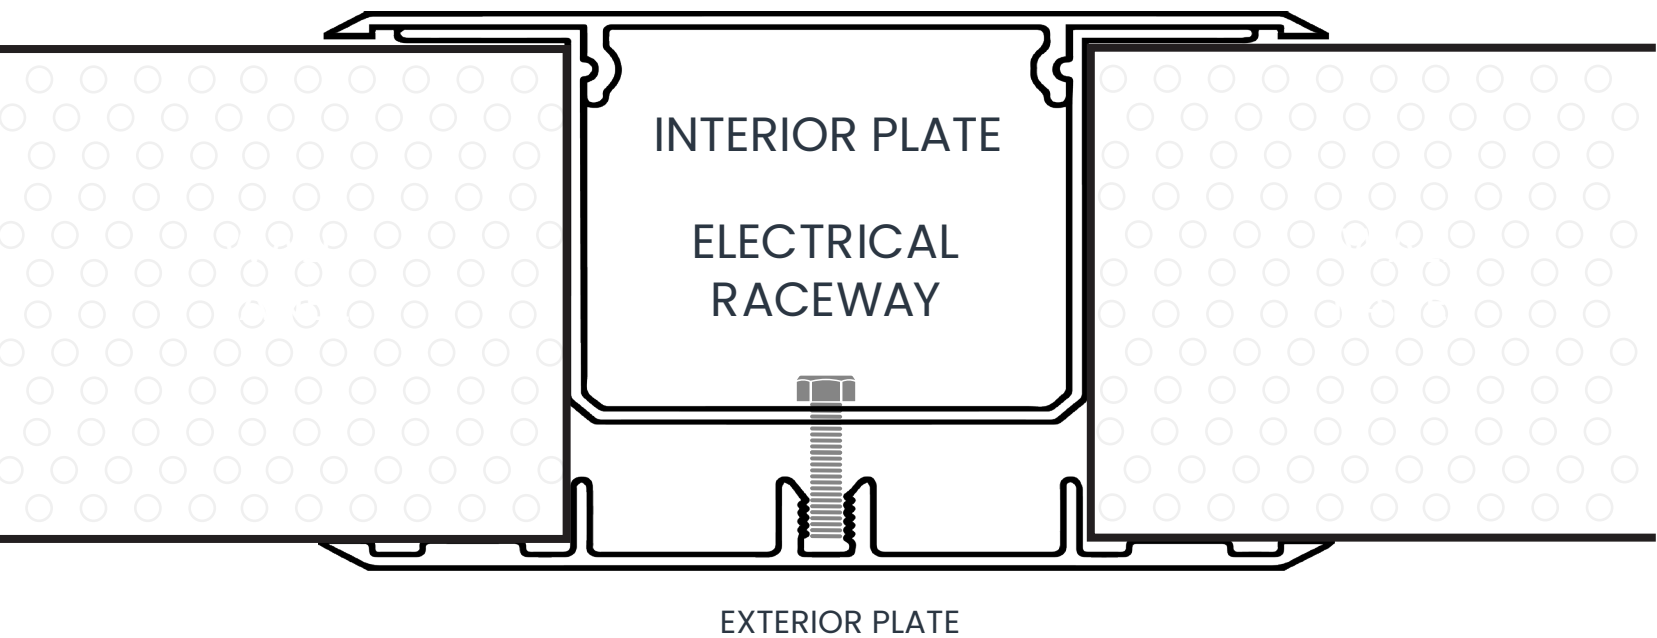

THE INDUSTRY'S NUMBER #1 SELLING SYSTEM

National was the first manufacturer in our industry to introduce an All-Steel, Certified Fire-Rated, Modular Building System over 30 years ago. Our patented design has been the preferred choice of businesses and organizations of all sizes and types for over three decades. The Steel System is compatible for a wide range of applications and allows customizable design changes to suit any requirement. It is also equipped for tremendous weight bearing capabilities, thanks to our superior pre-engineered designs that both incorporate and conceal our structural steel within our system. The non-progressive and universal design of our All-Steel system facilitates easy rearrangement or adjustment to your layout, including future capabilities for reconfigurations, relocations, or expansions, making it a popular choice for environmentally controlled spaces.

ALUMINUM CONNECTION SYSTEM

Our revolutionary All-Aluminum System, CleanWall Ultra™, has quickly taken the Modular Cleanroom industry by storm with it's sleek and feature rich design. This three-piece, seamless, non-progressive connection system can be utilized across a multitude of industries and applications. Without any internal seams, surface contaminants are reduced dramatically by at least 50% on all vertical connections. Furthermore, this system maintains all the hallmarks of National's modular construction philosophy by keeping all electrical and structural components concealed within the wall system, producing the best looking, fully functional system there is.

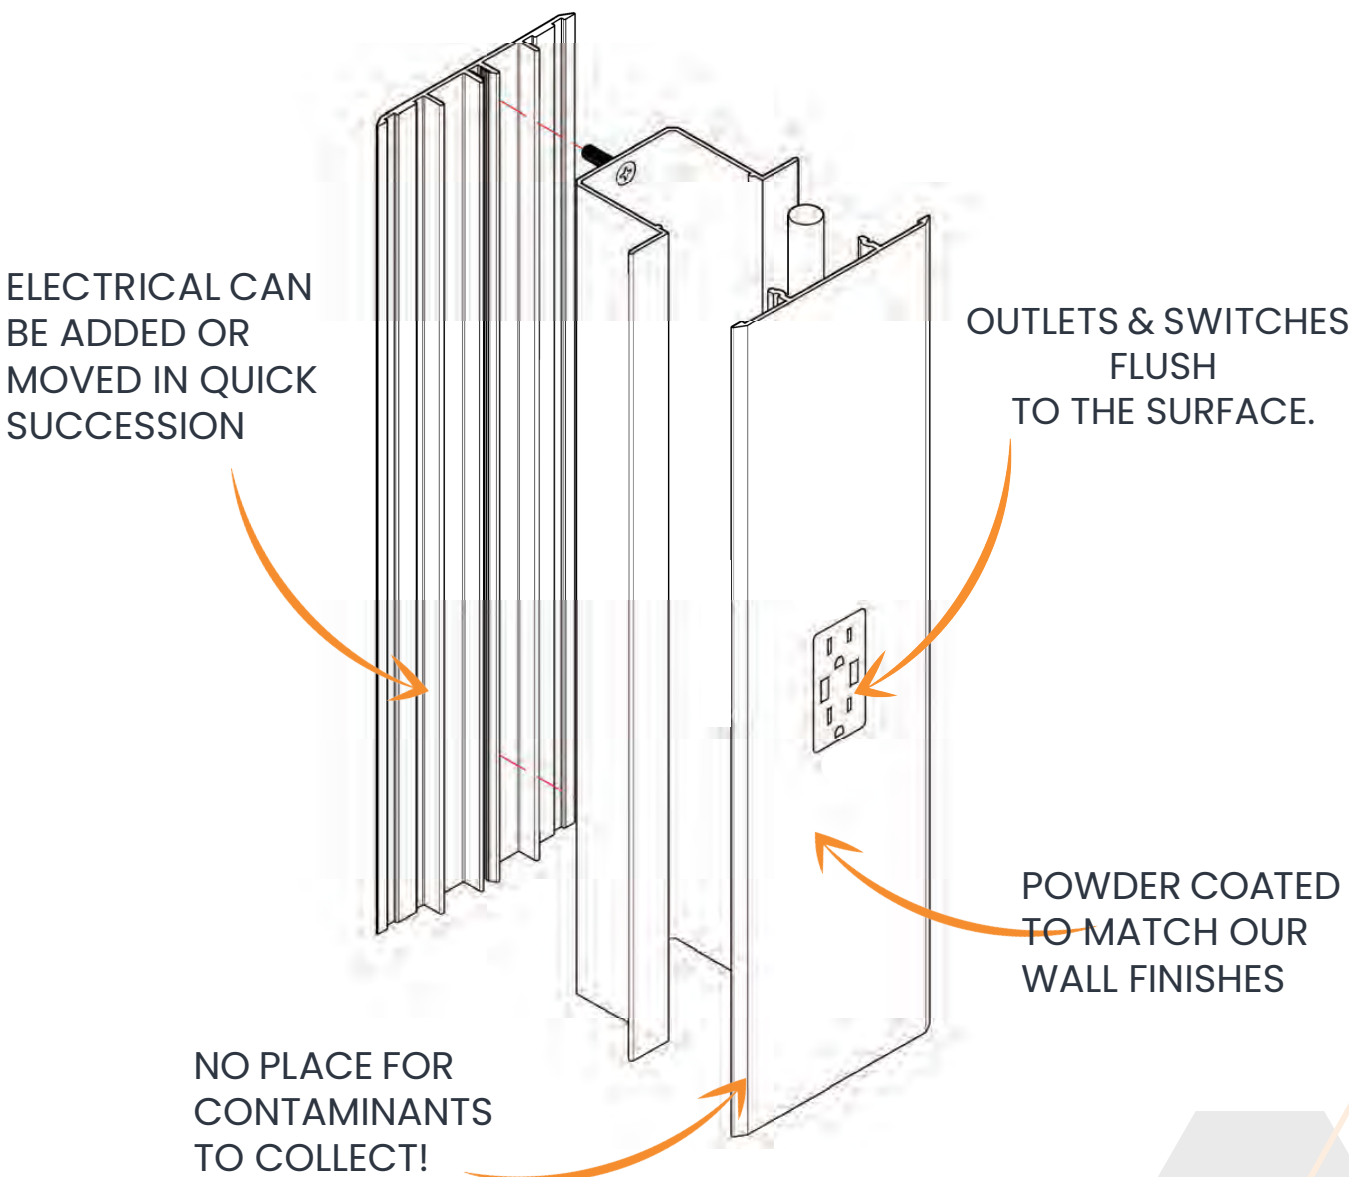

BENEFITS

- Best Looking System in the Industry
- Completely Compatible with our Steel Connection System
- The Easiest Assembly/Modification of any System
- Electrical, data, and phone lines can be added in only minutes
- Available in Heights up to 24" tall
- Powder Coated to Match or Anodized Finishes
- All structural steel concealed within the system
- Suitable for ISO 3 to ISO 9 Clean room

THE FIRST DESIGN OF ITS KIND!

Our patented system was designed from the ground up, to combine aesthetics and functionality in a single solution. It features a unique style of connection throughout the entire structure, created specifically for environmentally controlled spaces. Our All-Aluminum post system creates a solid, smooth, and seamless seal that is ideal for the unique needs of environmental rooms, providing a secure connection that keeps temperature, humidity, and air pressure controlled better than any other system out there.

ENVIRONMENTAL ROOMS

SAFELY STORE PRODUCTS OR OPERATE EQUIPMENT IN A CONTROLLED ENVIRON-

Change is a constant variable in today's business world, making the ability to quickly adapt a critically competitive advantage. The ability to re-purpose any office space, research laboratory, manufacturing plant, or storage area quickly, affordable and effectively gives companies the upper hand in their industry. Conventional construction is not designed for adaptation, nor is it cost efficient. However there is a solution, National Partitions Environmental Rooms are custom-designed and manufactured to meet the unique needs of your business. Using high-quality Class A materials and innovative technologies our environmental rooms are constructed to ensure a durable, long-lasting solution that provides superior insulation, energy efficiency, and environmental control. The connection systems allow for easy panel and electrical additions or relocations, minimizing downtime and preserving the investment in the build-out. Plus, with features such as specialized lighting, temperature control, humidity control, and ventilation options, you can be confident that your Environmental Room will provide a safe, comfortable, and productive work environment for your team. From Clean Rooms, GMP Rooms, Powered Paint Rooms, Grow Rooms, and Extraction Rooms National Partitions goes to great lengths to specially customize each room to your needs. Our Environmental Room modular design allows for easy customization, expansion, control over your work space so your environmental room can grow along with your business.

- Non-progressive design, you can easily expand the building without interrupting to workflow or production.
- Completely seal your entire building to prevent air leaks, water leaks, and sound or light emissions and intrusions, thereby preventing the entry of contaminants and cross-contamination into the workspace.
- Multiple high quality options for doors, roofs, windows, glazing, lighting, filtration, and wall types only at National.
- Our high-quality wall panels provide several advantages, including increased fire resistance, thermal resistance, sound deadening capabilities, and a moisture barrier.
- Seamless insulated wall panels up to 40' high utilizing baked-on acrylic painted 24 gauge galvanized steel.
- We provide in-house powder coating for our products, ensuring that your enclosure's finish and durability last for decades of heavy use.

CLEANROOMS

REMOVE PARTICULATES AND CONTAMINATION FROM THE EQUATION

National Partitions specializes in prefabricated modular Cleanrooms that provide exceptional flexibility in terms of modification or rearrangement of the space as per your requirements. The Cleanrooms are custom engineered to effectively regulate and control pollutants, ensuring the protection of your products or experiments from cross-contamination. Our Cleanrooms can be designed to meet ISO 5 - 9 and 209e classes 100-100,000, providing a controlled environment to suit any industry. The rooms are also flexible and adaptable, allowing you to modify or rearrange your space to suit your changing needs. We are committed to providing complete cleanroom solutions, including National's CleanWall™ panels that are specifically designed for use in cleanroom environments. National's cleanrooms host a wide variety of customizable options that help to fit what your looking for. We allow for the seamless integration of product pass-thus and air shower units which minimizes any risk of possible contamination in or outside the room. Additionally, we include wash down and sanitize packages that allow for easy cleaning and maintenance that eliminate bacteria. Our cleanrooms feature secure entry options, including interlocking doors and access control systems, to prevent unauthorized access and maintain a controlled environment. Whether you need a clean room for compounding labs, medical devices, or pharmaceutical packaging, we have a range of customizable wall systems to meet your specific requirements and preferences.

- Our cleanrooms are designed to work effectively for both positive and negative airflows, allowing for a controlled and regulated environment.
- Our unique air chase and return air chases ensures proper air filtration, minimizing the risk of contamination while maintaining a clean and unobstructed environment.
- Pre-wired FFUs/HEPAs easily integrated into our modular electrical system for dedicated air filtration.
- Completely seal our entire buildings to prevent the entry of contaminants and cross-contamination into the workspace.
- Multiple high quality options for doors, roofs, windows, glass, lighting, filtration, and wall types only found at National.

GMP ROOMS

KEEP YOUR TESTING AREAS CLEAN AND YOUR PRODUCTION FLOWING

National Partitions Good Manufacturing Rooms are the perfect solution for companies who require precise control of their environment to ensure their products are of the highest quality. Our GMP Rooms are designed with the manufacturing process in mind, providing an ideal environment for inspections, testing, and other critical processes. National Partitions GMP Rooms provide a well-lit, sterile environment for inspections, testing and much more. Many high-quality processes require a separate room for good manufacturing practices. One of the primary benefits of our GMP Rooms is the level of control they offer over the environment, while being flexible with the integration of large manufacturing equipment. With our interior heights are customizable to accommodate tall machinery and featuring clear span distance of over 55 feet. When FDA/USDA compliance is required, our modular GMP Rooms are ideal for a wide range of applications, including: compounding labs, cosmetic testing, medical devices, pharmaceutical packaging, and food manufacturing. National's GMP Rooms are easy to implement and can be tailored to for all Grades A through D, providing complete control over your environment. With a focus on maintaining product integrity and cleanliness, our GMP Rooms can prevent contamination of nearly any kind, including cross-contamination between products. National's GMP Rooms offer custom solutions to meet specific requirements to help companies achieve compliance and optimize their operations.

- Removable sections that allow for easy entry and exit of large equipment and materials while maintaining the integrity of the room's environmental controls.
- Our load-bearing roofs that can support any HVAC system. This ensures that your room will remain at the appropriate temperature and humidity levels, while maintaining a your HVAC System
- The floor track provides a raised cove base. Which helps to prevent the accumulation of debris and dust, which can compromise the integrity of your processes and products.
- The surfaces of our GMP rooms are designed to be smooth and flush, both inside and out
- Our GMP rooms are designed to be fully compatible with any airlock, PAL/MAL or pass-through. This allows you to create a customized and comprehensive system that meets your specific needs

POWDER COATING AND PAINT ROOMS

PROTECT YOUR INVESTMENT AND ACHIEVE THE PERFECT FINISH

National Partitions offers custom-designed Powder Coating and Wet Paint Rooms that cater to the specific needs of finishing systems. These rooms provide a secure, insulated, noise-reducing, and clean space that is crucial in producing high-quality finishes. Powder coating is critical to ensuring a quality end-product, and having an environmental room is essential to achieving a high-quality finish. National Partitions understands this importance as the only manufacturer in the industry that powder coats their products in-house, providing customers with an enclosure that will last as long as their own finishes.

These rooms offer complete control of humidity, air quality, and particle emission rates, allowing you to set temperatures or ambient conditions as needed. Our powder coat rooms can be easily relocated and configured to fit any size area, machinery, or powder coat line, or adjust to new ones. We utilize innovative options to create our powder coat rooms, such as custom openings for product and conveyor systems of all sizes. National's Powder Coat Rooms are fabricated with our plunge cut windows, to prevent debris from collecting on ledges. We understand the importance of high-quality materials and coatings in producing a durable and long-lasting product, which is why we offer a 10-year guarantee on our products.

-  Custom pass-throughs that can be modified to match your specific product lines or easily adjusted if your product lines change, ensuring that the room continues to meet your needs.
-  Insulated Panel options to control Temperature and Humidity in any location, from R-7 to R-19, National's Environmental Rooms are designed for the ultimate control of your environment.
-  Designed to be full self-supporting as well as compatible with any existing overhead roof and/or ceiling system, being able to fully seal an area floor to ceiling, even over 40' High.
-  Removable Wall Sections that allow large machinery or conveyors to enter or exit the room with no disruption to work flow.
-  Our powder paint rooms feature drop down wiring that can be easily routed to any location within the room allowing for flexibility of machine placement.

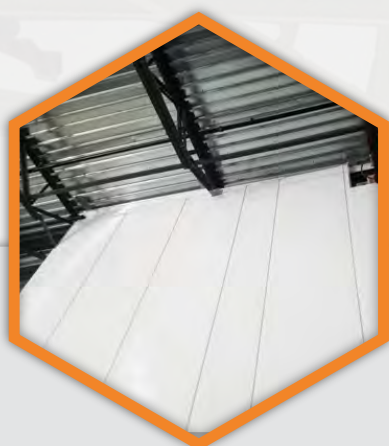

LASER ROOMS

WHEN PRECISION AND SAFETY MATTER

National Partitions' Laser Rooms – the ideal solution for containing lasers and high-frequency light emitting machines within a safe and restricted area. Our Laser Rooms limit the presence of contaminants, such as dust and other particles. Our Laser Enclosures also allow you to control temperature and humidity. Since they are prefabricated, they can be set up quickly. With our prefabricated Laser Rooms, you can get up and running quickly and efficiently. Plus, if you ever decide to rearrange your layout, our enclosures are easily redesigned and relocated to fit your new needs.

At National Partitions, we prioritize the safety of your workers and visitors, and special attention is given to our drafting process to ensure that any laser blocking glass matches the laser light wave length and frequency emitted. All doors provided with a Laser Rooms have specific gasketing and seals designed prevent the light from escaping. National Partitions for a high-quality Laser Room that is fully customizable to meet your specific requirements. Our team of experts will work with you every step of the way to ensure that your Laser Room is designed to your exact specifications.

- Our Aluminum Connection system is designed for complete light security and to contain all laser light emissions within the room.
- We use high-quality laser glass for doors and windows to provide maximum protection from light emissions.
- Our system includes integrated panelized roofing, TightSeal™ Door Packages, and a wide range of specialized laser glass options tailored to your project needs.
- We use seamless insulated wall panels that can go up to 40' high, made from baked-on acrylic painted 24 gauge galvanized steel. The ideal surface for Laser Rooms.
- Our TightSeal™ Package completely seals an area making it "LightTight" and consists of our full jamb gasketing, Light secure nylon door sweeps, and thresholds.

GROW ROOMS

SAFELY STORE PRODUCTS OR OPERATE EQUIPMENT IN A CONTROLLED ENVIRONMENT

National Partitions' Grow Room buildings are perfect for the indoor cultivator looking to maximize profitability in any area. Our prefabricated, solutions provide complete control over temperature, air quality, and light absorption for plants, while ensuring that no light pollution escapes the room or full enclosure to minimize external factors that could impact other processes. Additionally, our connection systems were designed to prevent cross contamination and bacteria transfer between operations and wash down areas, as well as between separate rooms that are designed for specific purposes.

Popular applications include farming, greenhouses, hydroponics, medical marijuana and mushroom facilities. Our Grow Rooms can clear span up to 55 feet wide or expand even further with interior column supports to accommodate any length imaginable, and walls up to 40 feet high for tall vertical growth stations. National Partitions also integrates electrical, site specific wiring, data, and plumbing can be completely concealed within our system for a streamlined appearance. Even fire-suppression systems can be integrated with ease, even after a building has been assembled. Trust National Partitions standards of precision and functionality to ensure your grow room is at a maximum performance level!

- 📦 Baked on acrylic 24ga Enameled Steel, Class A FRP, and even Aluminum Panel Surfaces available . Custom panels of any configuration to meet any requirement.
- 📦 Our complete Grow Room connection system, from floor tracks to door jambs are designed to withstand high levels of moisture and regular wash-downs.
- 📦 Our Aluminum connection system is designed to contain water, moisture, and chemicals within the room. This ensures that your Grow Rooms remains free from cross-contamination.
- 📦 We offer a full range of door sweep options, including nylon haired, rubber ribbed, light & pressure control, and more nylon haired, rubber ribbed, light & pressure control, and more doors meant for the rigors of industry.
- 📦 Our Grow Rooms are designed to be high-traffic ready and can be easily integrated with nearly unlimited customization options, incorporating nearly any lighting, plumbing, surveillance, door security, and internal structural support systems for your operation's needs.

EXTRACTION ROOMS

WHEN EVERY DROP COUNTS

National Partitions' Extraction Room is meticulously engineered to offer an optimal space for the precise and safe extraction of oils and other substances, transforming them into refined chemicals. A specialized and controlled environment is essential for delicate operations involving the harvesting of medicinal plants or oils. Given the volatile nature of these chemical processes, a dedicated, secure, and fire-rated space is not just a regulatory requirement but a critical safety measure.

All of our modular systems adhere to a minimum Class A fire-rating, and we proudly boast certifications for both 1-hour and 2-hour fire rated systems. A National Partitions Extraction Room epitomizes safety and environmental responsibility while guaranteeing efficiency and quality in the extraction process.

Large equipment like vats and centrifuges are integral to extraction operations but can sometimes fail or require maintenance. Our modular design offers unparalleled flexibility in such instances, with customized removable wall sections. Even without prior planning, our innovative connection systems allow easy disassembly and reassembly of walls or entire buildings in little time.

Whether you represent an established commercial growing operation or are embarking on a new cultivation venture, our team of experienced drafters, engineers, and installers possess the expertise to meticulously erect an environment that precisely aligns with your unique requirements facilitating rapid occupancy.

- Our panelized system can withstand even the most demanding washdowns that involve high pressure, high heat, and harsh chemical cleaners
- Our extraction and quarantening rooms are CID1 compliant with our fire-rated systems, providing a safe and compliant environment for all your extraction processes.
- We offer a wide range of door, window, and rollup door options, and can integrate nearly any aftermarket accessory, such as air showers, seamlessly into our modular building system.
- Add removable sections that allow large machinery or conveyors to enter or exit the room with no disruption to work flow.

CUSTOM FABRICATION

MANUFACTURED TO YOUR NEEDS

National Partitions provides custom-built solutions for any application. We understand the importance of innovation and how it requires custom solutions that reflects your company's vision. We lead the way in providing quality multi-use modular buildings through innovation, experience, and development.

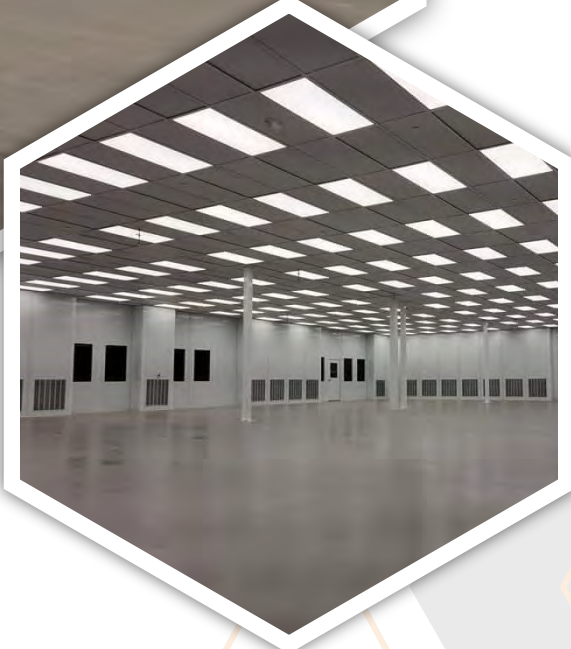

There are no limitations to the size enclosure that can be designed and built using National Partitions modular panel systems. We aim to meet our clients unique project requirements and ensure the best possible outcome. If you have the space we have the solution.

Through architechural drawings, custom fabrication, and decades of experience, National Partitions can help bring your ideas to life. Let us show you what Modular can really do!

- ✓ Modular Building Fabrication
- ✓ Custom Wall/Panel Configurations
- ✓ Steel/Aluminum Fabrication
- ✓ Window Fabrication
- ✓ Door Fabrication
- ✓ Mezzanine Fabrication

20 YEAR PROTECTION

REMARKABLE REMOVAL

To help keep your modular building looking its best, National Partitions and Sherwin-Williams Coil Coatings have partnered together to offer an Industry Exclusive, Built-In Protection that's quite literally, Graffiti Grade.

Sherwin-Williams Coil Coatings have tested and approved an ASTM-compliant graffiti-resistant system for all of National Partition's building products with their coil coatings. Resistance to graffiti is a major product benefit never offered before in the modular building industry. A cost-effective solution to protect the appearance of your investment from just about everything, from basic dirt & grease all the way to permanent markers & spray paint.

In addition, our Sherwin-Williams coating's Film Integrity is guaranteed for a full 20 years against things like fading, blistering, peeling or chipping.

National's Modular Environmental Rooms... Buildings that are as beautiful as they are tough!

CUSTOMIZED TO MEET YOUR BUILDING PRODUCT REQUIREMENTS

PolyPREMIER, by Sherwin-Williams Coil Coatings, is a line of multi-purpose polyester coatings formulated specifically for metal buildings and multi-purpose product components.

USDA COMPLIANT

This polyester formulation is a bright white, USDA-compliant finish that is recommended for spaces where incidental contact with food occurs. It is designed to remain a bright white color in highly acidic and corrosive environments.

BENEFITS

- Outstanding resistance to sun, rain and other elements
- Exceptional abrasion and scratch resistance
- Good dirt and stain resistance
- Excellent overall adhesion
- Great flexibility & formability
- Strong exterior durability
- Impressive color and gloss retention

PHYSICAL TESTING

- Abrasion Resistance
- Graffiti Resistance
- Humidity Resistance
- Impact Resistance
- Salt Spray

ASTM' TEST METHOD

- ASTM D968, Method A
- ASTM D6578/D6578M
- ASTM D2247:
- ASTM D2794
- ASTM D1654:

AAMA 2603-17A REQUIRED TEST RESULT

- Total Sand = 35 ± 5 liters
- Meets and exceeds
- 2,000 hours: No blistering or loss of adhesion
- Galvalume: 3x metal thickness, no loss of adhesion.
- Aluminum: No field blistering, no more than 1/32" creep from the scribe

GRAFFITI

Yes, even graffiti can be easily removed from your National Partitions building. Graffiti presents a special problem because of the many possible agents used, generally aerosol paints. Sherwin-Williams has approved Watts Removal Products solutions as our approved graffiti removal product. Watts Removal solutions are environmentally friendly, non-toxic and water soluble.

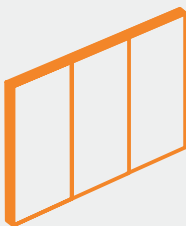

WATTS REMOVAL PRODUCTS

Watts Removal solutions are environmentally friendly, non-toxic and water soluble. Easy application process, use a soft brush to apply and wet cloth to remove. Use only Sherwin-Williams approved products from Watts Removal Products. To purchase approved product contact them at wattsremoval.com.

OUR COMPONENTS

WALL PANELS

We provide the most advanced Wall Panels in the Industry, which can be tailored to fit a variety of uses.

LEEDWall™

The leader in environmentally friendly wall designs.

CleanWall™

Clean, durable and washable wall surface.

ToughWall™

Our strongest and most durable wall surface.

RuggedWall™

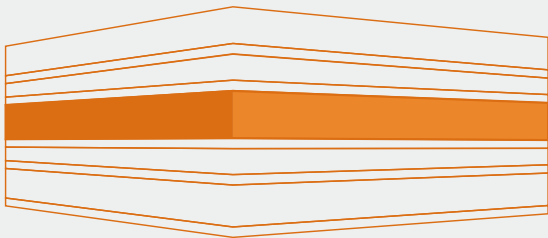

A stronger wall surface that provides high sound reduction.

HiWall™

A wall surface with the ability of going up to 40 feet tall.

CORES

At National Partitions, our custom wall panel cores are engineered to suit your project's requirements. Constructed to fill the inner part of the wall panel, these core materials are available in a variety of features including thermal insulation, fire resistance, and soundproofing.

Thermal Core

Expanded polystyrene core, 1.0 pound density antimicrobial, fire resistant board for excellent R-Values

Honey Comb Core

Resin Impregnated, Kraft Honeycomb

NC-TYPE Core

Steel studs glued to 5/8 inch thick gypsum board glued to stud framing

1-Hour Core

Steel stud frame, thermafiber insulation, and 5/8 inch thick Type X fire resistant gypsum board mechanically fastened to the frame

Hush Core

Steel stud frame with acoustical batt insulation, two steel sheets encapsulating stud and insulation. For the best sound reduction in Industry with an STC-45+

DOORS

National manufactures the BEST Door in the Industry! Our 18 gauge heavy duty steel door and 16 gauge frame are powder coated for ultimate durability and a heavy duty tight sealing gasket blocks all dust and noise from entering the building. Double, Dutch, Sliding, High-Impact, Roll-up and other doors available.

WINDOWS

Many types and sizes of windows are available to accommodate your project's requirements. Windows we offer include 4'x6' full light windows, 4'x4' half light windows, 4'x4' sliding windows, and 4'x4' sound-deadening windows. With glazing options ranging from Tempered, Laminated, Laser, Tinted, Poly-Carbon, or Wire Glass. Our window types are easily installed, from our stackable design or our plunge cut style that is already pre-installed into the panel, and are available as flush to one or both sides of the panels.

ROOFS/ CEILINGS

National's Roof Solutions are designed to meet any Industry's requirement for Load-Bearing Support(up to 250PSF), Dust Coverage, Environmental Sealing, Noise Canceling, and even Fire-Rating. With another Industry First... In-house Roll-Formed & Painted 18 to 22guage Corrugated Steel B-Deck! Ceilings are available in any configuration and design, from our standard 2x4 Office Grade System, to our Air Tight Seal for Clean room type applications with gasketed grid and ceiling panels.

ELECTRICAL WIRING

National's Modular Electric System! All wiring runs and harness connections are completed during production at National Partitions. Enjoy the freedom and efficiency without all the extra hassles. Our UL-listed, heavy-duty, snap-together system makes your electrical installation completely hassle-free, with a pre-wired system that you can easily assemble or relocate yourself. Our electrical package comes complete with light fixtures, switches, duplex outlets, and 220v outlets. An electrician is only needed to run power to the breaker panel.
